

SUMMARY

Final-year Computer Science Engineering student specializing in **Data Science** with strong skills in **C, Python, and R**. Experienced in **Machine Learning, Generative AI, NLP, and Data Analysis** with projects in **healthcare, crime analytics, and real-time AI applications**. Proficient in **SQL, HTML, CSS, JavaScript** with hands-on work in **EDA, model development, and deployment**. Achievements include solving **100+ LeetCode problems (DSA, Algorithms)** and earning the **Salesforce AgentBlazer Silver Champion badge (35,000+ Trailhead points)**.

EDUCATION

Alva's Institute of EGINEERING and Technolog

Bachelor of Engineering in CSE(Data Science); GPA: 7.71

Sri Marikamba Govt. College

PUC (PCME); 79%

Dakshinakannada, India

September 2022 - August 2026

Sirsi, India

June 2020 - May 2022

SKILLS SUMMARY

- **Languages:** Python, SQL, C, R Programing, HTML/CSS,Three.js, Node.js
- **Frameworks:** Pandas, Numpy, Scikit-Learn, Matplotlib
- **Tools:** Power BI, Excel, PowerPoint, Tableau, MySQL, SQLite
- **Platforms:** PyCharm, Jupyter Notebook, Visual Studio Code,Streamlit
- **Soft Skills:** Rapport Building, Strong Stakeholder management, People Management, Excellent communication

WORK EXPERIENCE

DATA ANALYST INTERN | UNIFIED MENTOR

July 2025 – October 2025

- Performed Exploratory Data Analysis (EDA) on large datasets to extract patterns and trends.
- Developed and evaluated machine learning models for classification and forecasting tasks, improving prediction accuracy.
- Automated data preprocessing pipelines including cleaning, transformation, and feature engineering to enhance model performance.
- Applied Python, Pandas, NumPy, Scikit-learn, and visualization tools to generate actionable insights for decision-making.

PROJECTS

Netflix Data Analysis(Python, Pandas, Matplotlib, Seaborn)

May 2025- June 2025

- Conducted **Exploratory Data Analysis (EDA)** on the Netflix dataset to identify **content trends** across genres, release years, and countries.
- Analyzed viewing patterns to highlight **regional preferences, genre popularity, and platform growth trends**.

Generative AI Text Summarizer (Python + NLP)

June 2025- July 2025

- Developed an AI-powered text summarization tool using transformer-based NLP models.
- Automated long-document summarization, reducing text length by up to 60% while preserving key insights.

Facial Emotion Recognition (CNN + Python + OpenCV facial)

April 2025- May 2025

- Built a real-time system to detect and classify facial emotions using **Convolutional Neural Networks (CNN)**.
- Integrated OpenCV for live video streaming and preprocessing of images.

Skin Disease Prediction (Python + ML)

March 2025- May 2025

- Implemented **machine learning** models for classification of skin conditions using the HAM10000 dataset..
- Applied **Scikit-learn** and **Python ML libraries** to achieve high classification accuracy.

AI Crime Investigator (Python + SQL)

March 2025- May 2025

- Designed **predictive ML models** to identify crime hotspots and behavioral trend.
- Built **data pipelines** for preprocessing, feature extraction, and predictive analysis.

CERTIFICATES

Infosys Springboard Data Science

Introduction to Data Analyst (IBM)

Salesforce Agentblazer Champion Silver badge

Deloitte Data Analyst Certificate

AWS Solution Architecture Certificate

April 2025

March 2025

August 2025

April 2025

March2025
